

Second Call for Paper

The 3rd International Conference on Transportation and Logistics (T-LOG 2010)

www.t-log2010.com

Date: September 6-8, 2010

Place: Nishijin Plaza, Kyushu University in Fukuoka City, Japan

➤ Introduction

International Conference on Transportation and Logistics, T-LOG is aimed to provide a technical forum discussing current problems, solutions and the future development of transportation logistics. Practitioners and academics will gather to present, discuss and exchange their knowledge and experience in fostering ideas. Thus, it will provide an excellent opportunity for transportation and logistics professionals to exchange technical information and learn from each other's successes and experiences.

The first International Conference on Transportation Logistics, T-LOG2005, was held in Singapore. Following its success, the second conference, T-LOG 2007, was held in Shenzhen, P.R. China, with more than 100 academic papers presented. The next T-LOG conference, T-LOG 2010, will be held from 6 to 8 September 2010 in Fukuoka, Japan. Fukuoka has a nearly a-thousand-year history as an international trading city and has historically firm relations with Asian cities, especially northeast Asian cities. Fukuoka, with a few international container ports and airports, is now growing to be a gateway city connecting Asian cities and Japan, and therefore is suitable as the host of the T-LOG 2010 conference. To explore the city even further, technical tours visiting transport facilities and factories which have notable technologies related to logistics will be arranged.

Authors are invited to submit their original, previously unpublished papers focused on the themes of Transportation Logistics, including research, theory, development, and applications.

➤ Topics

Topics of interests include, but are not limited to, the following:

- Strategy and Planning
- Security Management for Logistics
- Reverse Logistics
- ITS and Logistics
- International Freight Transportation
- Freight Routing and Delivery Analysis
- Aviation Logistics
